<b>Door &amp; Frame</b>		Flame Spread ASTM E84	15 Test Result
Material	6560 T-6 Temper Aluminum	UL-R4036 rated for use under 165 degree F. fire suppression systems	
Tensile Strength	30,000 psi		

### Measuring for Heat Activated Ceiling

#### Measurements Needed

- Total Aisle length
- Aisle width (Use widest point as measurement)
- Height of all cabinets, in-row cooling units or UPS systems in row (Leveling kits and Rigid Walls can be used to create even rows)
- Ceiling can overlap 1" to 6" onto top of cabinets
- Check for any obstructions above the cabinets around the inside edge of aisle
