About Us

Electronics Packaging

Innovative Manufacturing Solutions

AMCO Enclosures has been a leader in the development of enclosure and mounting systems for over seven decades. Our innovations have become the standard for housing electronics and data systems over that time, trusted by companies and institutions providing services that touch virtually every aspect of your daily life.

The world relies on us to provide protection for the equipment that tracks satellites, moves trillions of dollars every day, keeps track of vital health information and processes data about distant planets.

From military installations to banks and hospitals, AMCO Enclosures provides stability and security for the information your world runs on.

Electronics Packaging

AMCO Enclosures is proud to introduce its electronic packaging lines, featuring the Titan EP rack system, PDMTA desktop cabinet and aluminum Structural Framing System (SFS).

Our new Titan EP enclosure is feature-rich and structurally superior as it enhances user interface, reliability, heat dissipation and security with an aesthetically appealing design. We have engineered performance-level standards into our enclosures that keep AMCO at the forefront of enclosure design and development. Our static and dynamic load ratings are the highest in the industry. These enclosures have the built-in flexibility to meet the most demanding requirements and have been tested and certified to

MIL STD.810E for vibration and MIL STD 901D for shock. (Test results are available upon request – some additional accessories are required).

For electronic packaging in a smaller footprint, AMCO presents PDMTA, our line of bench and portable enclosures. These enclosures are the most efficient way to mount your system instrumentation in a portable desktop design.

Our aluminum Structural Framing System (SFS) is perfect for designs that require a lightweight enclosure with high-strength capabilities. This line features 13 different extrusions and 8 different castings that can be mixed and matched to create specific designs for temporary or permanent implementation.

Online Configurator

AMCO Online Configurator

Use this catalog as a guide to design your rack online.

A MCO's rack configurator provides you with maximum results in a minimal amount of time.

No cost, nothing to learn, no software to run – this is a fast and simple to use web-based rack configurator.

Quick, simple steps produce maximum results. Choose a cabinet size (h x w x d) – image adjusts based on your specifications. Continue by adding available accessories.

Place internal accessories and your equipment in the exact RU locations that best fit your rack's specific design requirements.

Results Include

- Bill of material for specific configuration (includes product descriptions and weights)
- Drawing of configured rack for visual reference with accessories mounted in place
- Virtual image to zoom in and out of and 360° view for specific image details
- Saved configurations for reference and future updates
- Quote – based on specific request

Titan EP Overview

About Titan EP

Aside from having the highest static and dynamic load ratings in the industry, this enclosure system is extremely flexible in providing custom designs with standard components that expand your system's capabilities. Choose from an extensive selection of frame sizes and colors, then select the door, top, side panels and mounting channel options. A full line of internal accessories completes the design. Modified or custom enclosure designs are available by contacting your local sales representative or contacting us directly at (847) 391-8100.

Titan EP External Features

Top Panels

Top panels include 8-10 cable egress ports (depending on depth) and come in a variety of designs including fan and vented models. A solid top panel is also available without cable egress ports.

Design

Titan EP racks feature a contemporary design with beveled corners that blends well in every environment.

Side Panels

Side panels feature spring latches that slide to open and secure the side panels in place. A keyed lock is also included.

Doors

Curved and flat mount doors feature a contemporary design aesthetic. Door options include solid, vented, polycarbonate and louvered in face and flush mount designs.

Door Hinge

Doors are reversible (left/right-handed) with an easy on/off hinge system.

Titan EP Internal Features

Construction

Frames consist of fully welded construction with multiple forms to enhance overall static and dynamic load performance.

Channels

Mounting channels feature universal (square) or tapped hole mounting as they provide flexibility in metric and domestic hardware deployment.

Side Struts

Side struts feature uni-strut channels, providing fully adjustable front-to-rear equipment mounting.

Accessories

Racks have the flexibility to expand to meet the evolving requirements of your system designs.

Base Plates

Base plates close off the bottom of the enclosure, keeping out air, dust and other elements that might damage your system. Available in both solid and brush strip models. The brush strip model facilitates easy cable egress.

Frame Base Construction

The base has multiple forms and is enhanced with 4 caster brackets that encase the casters for added protection and support.

Below Base

Above Base

Multiple-bay Joining- Fast & Easy

Titan EP racks can be joined together with simple hardware to form multi-bay consoles. No complex joining systems or structures are required - simple nut and bolt hardware makes multiple-bay joining fast and easy.

Titan EP Frames

Frames

Titan EP frames provide exceptional support for your electronics packaging. Our fully welded frames have been designed and engineered from the ground up. The multi-formed main channels in each of the four corners provide unmatched weight support. With formed gussets and side uni-struts, this frame provides industry leading static and dynamic load ratings. Mounting channels are included with each frame. (See Page 12 for mounting channel options).

All Titan EP racks have a ten-year warranty.

Certified Load Ratings:

Static: 5,400 lbs.

Dynamic: 3,300 lbs.

Frames Include:

- Contemporary design
- Certified to MIL STD 901 (Shock) and MIL STD 810 (Vibration)
- Individually numbered RUs
- Four weld studs in each caster base for grounding
- Four 1,000 lb. leg levelers for ground support
- Durable powder coat textured finish
- Joining hardware kit

Design

Titan EP racks have been designed and in-house tested, along with being certified by independent test labs to provide the peace of mind that these racks can withstand even the most demanding environments.

Our packaging has been engineered and developed to assure you that your rack system arrives on-site as originally manufactured.

Tip N Tell labels also protect against possible damage to your rack during product transit.

Mounting Channels

M6 (Square) Holes

MCX Profile

MCW Profile Reducer

Mounting Channels

Mounting channels are fully adjustable front to rear within the enclosure, providing easier equipment adjustments.

All mounting channels have a clear zinc finish, and feature your choice of either M6 (square) or #10-32 (tapped) holes with individually numbered RUs for each rack unit. Individually numbered rack units make equipment installation fast and easy, minimizing downtime.

MCX profile features standard 19" mounting in 24" overall frame widths. MCW profile reducer features 19" mounting in 24" panel opening space for 29" overall frame width. There is an additional 2.5" on either side of the mounted equipment for cable or power management.

Doors

Curved-Face

Square-Face

Doors

Doors are available as either face or flush mount. Face mount doors mount on the exterior of the frame. Flush mount doors mount flush to the frame.

Door Features:

- Concealed hinges offer easy on/off release
- Doors can be used as either left-hand or right-hand
- Vented doors feature a 77% open airflow pattern, exceeding major equipment vendor requirements
- Swing handles with keyed locks
- Combination swing handle locks optional
- Locks can be ordered keyed alike or separately (keyed separately option quoted upon request)
- Doors are available in solid, smoked polycarbonate, vented and louvered

Side Panels

Side Panel

Louvered Side Panel

Side Panels

Side panels have been designed for use as baffle panels or to finish off the sides of the enclosure. With this design, two frames can be joined together while separating the internal environment within each frame. Side panels mount within the side perimeters of the rack for a flush design aesthetic.

Side Panel Features:

- Side panels come with one keyed lock (36" depth side panel has two locks), keeping panels secure
- Side panel latches provide easy on/off mechanism (latches not included on 12RU-24RU panel sizes)
- Side panels can be mounted between cabinets when bayed together
- Side panels can be bolted from within the rack for permanent mounting

Side Panel Features

Keyed Locks

Side panels come with locks that keep the side panel secure.

Side Panel Latch

Side panels include a latch system for easy installation and removal.

Louvered Side Panels

Louvered side panels mount within the side perimeters of the rack for a flush design aesthetic, and can be bolted to the inside of the frame for security or used with easy on-and-off access. Louvered side panels provide additional protection against the external environment as two separate rows of five-inch-long louvers assist in passive heat dissipation. Horizontal vents keep out falling water, dust and other debris that can harm internal equipment.

Top Panels

Solid w/o Cable Egress Ports

Vented

Solid

BTA4 Fan

BTA6 Fan

BTA10 Fan

Top Panels

Top panels provide expanded options to address today's cooling and cabling requirements. They also provide an additional level of security as they are bolted directly to the top of the rack.

Five of our top panels feature multiple cable egress ports, which include dust covers to close off the top when the ports are not in use.

Solid without Cable Egress Ports

- One-piece, solid-plate construction seats flat within the top of the rack

Vented

- One-piece construction featuring vented section of .187" x .937" slots

Solid

- One-piece, solid-plate construction sits within the top of the rack with a brush cutout in each corner

BTA4 Fan

- Top panel includes two BTA4 fans with 100 CFM per fan, 6' power cord and external finger guards.

BTA6 Fan

- Top panel includes two BTA6 fans with 300 CFM per fan, 6' power cord and external finger guards.

BTA10 Fan

- Top panel includes one BTA10 fan with 640 CFM, 6' power cord and external finger guards.

Cable Egress Ports

Cable Egress Ports

Cable egress ports address demands of wire and fiber cable deployment above the server rack.

For Size 29W, contact AMCO Direct for Pricing & Lead Times

Top Panels with Fans

Top panels with fans feature tube axial fans that generate maximum air movement by using specially designed airfoils for performance in minimal spaces. All fans are 115V (230V quoted upon request) and include a 6' power cord with plug and chrome-plated finger guard for safety. Multiple fans mounted to panels are series wired. Depending on your exact design requirements, fans can be purchased as intake or exhaust.

Please specify "E" for exhaust or "I" for intake at time of order placement.

Base Plates

Base plates are manufactured from 14 GA. CRS and provide a safe and secure, heavy duty surface at the bottom of the enclosure. They are internally mounted to the enclosure for ease of assembly and access. Base plates provide protection from outside elements and are available as a solid panel or with dual brush strips that provide easy cable and power entry/exit into the rack without affecting the enclosure's internal environment.

Open area of dual brush strip section is 16" L x 5" H for larger power cords and cable bundles. Base plates feature two additional 12-24 grounding studs that are .625" long, located on the internal side flange of the base plate.

Ground Bar

Vertical busbars are used to ground your valuable equipment within the rack. Busbars are copper with a 1" W x 1/4" D profile. They feature #10-32 tapped holes.

Lacing Bars

Lacing bars are sold in packs of five. Standard finish is black powder coat.

Cable Lacing Strips

Vertical cable lacing strips provide mounting support for PDUs and cabling. Cable lacing strips have a combination of M6 holes for cable ring mounting (HK-CR1) or equipment tie down, while the slots can accept cable ties, fasteners, etc. Lacing strips are sold individually. Standard finish is black powder coat.

Cable Ring Kit

Cable rings easily mount to M6 holes in cable lacing strips and provide an immediate tie-down point for cabling.

Sold in packs of 10.

Hardware Kits

Additional mounting hardware is available for equipment mounting.

Square Hole Mounting Hardware Kits

HKM6-25 or 50- M6 hardware for equipment mounting. Includes 25 or 50 M6 mounted screws.

HKDZ-25- (25) M6 Metric DZUAS easy inserts and M6 clear chromate screws.

Cooling

Fan Stack

Fan stack units provide active cooling for a specific electronic component within the rack and come in two depths. These units install as easily as a shelf and have a five-foot power cord. Fans turn on from 83°- 85°, keeping components cool. Standard finish is black powder coat.

Part Number	CFM (total)	DB	Voltage	# of Fans	Fan Dia.	Depth
UA-FS1-S8	120	27	115	2	4.75"	8"
UA-FS1-S14	120	27	115	2	4.75"	14"

Fan Panel With Display

Fan panels with a digital display allow you to set the sensor to a specific temperature range of 58° to programmable max and have a six-foot power cord. This ensures that your electronic components will operate at peak performance. Standard finish is black powder coat.

Part Number	CFM (total)	DB	Voltage	# of Fans	Fan Dia.	Rack Height
UA-QFD2-4	100	28	115	4	3"	2RU
UA-QFD3-2	120	27	115	2	4.75"	3RU

Fan Panel Without Display

Fan panels have a preset activation temperature of 83°- 85° and five-foot power cord. This ensures that your electronic components will operate at peak performance. Standard finish is black powder coat.

Part Number	CFM (total)	DB	Voltage	# of Fans	Fan Dia.	Rack Height
UA-QF2-4	100	28	115	4	3"	2RU

Aluminum

Aluminum SFS

Our heavy duty aluminum Structural Framing System (SFS) is a simple method of designing and building frames and enclosures to special size and strength requirements. This unique AMCO Enclosures system provides a selection of 13 aluminum extrusions (1.50" OD) and 8 types of corner castings (0.125" wall thickness). The flanges in the extrusions accommodate .625" formed panels and .125" flat panels (made upon request). The system accepts locking clips (provided standard) for permanent designs or non-locking clips (optional) for prototypes or planned disassembly. When reinforced with bolt-on gussets, SFS assemblies can meet MIL-STD-167-1 shock and vibration requirements.

Ordering Information:

The SFS can be ordered in the following ways to meet your current and future requirements:

- Completely pre-configured, assembled and shipped ready to load
- In cut-to-size kits (assembly required)
- As bulk material (castings and extrusions you can stock, cut and modify yourself based on per project requirements)

Aluminum Gusset with Hardware
ALG

Locking Clips
ALC-S

Non-Locking Clips
ALC-SN

Pins
H264

Aluminum Castings (Material: 356-T6 aluminum per ASTM B108)

Castings are furnished with locking clips for assembly to extrusions. Special services available include: machining, hardware installation, marking and packaging.

ALC-1
Three corner casting

ALC-2
Four ear corner, joining or foot casting

ALC-3
0° to 120° hinged casting

ALC-4

ALC-6
Five ear corner casting

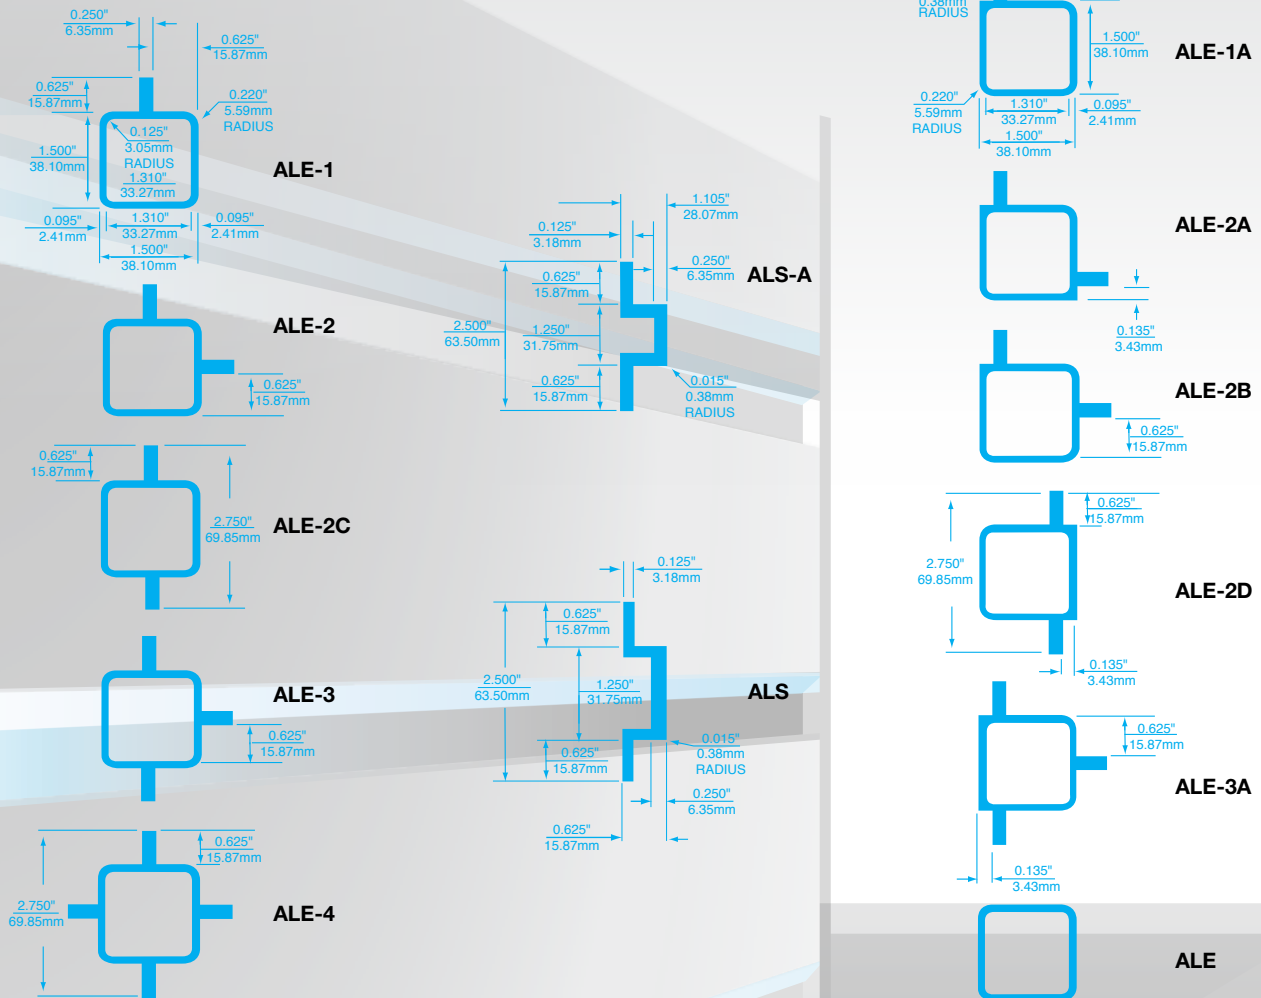

ALC-7
Four ear (cross) joining casting "X"

ALC-8
Six ear joining casting

SFS Extrusion Profiles

SFS Extrusion Profiles (Material: 6061-T6 aluminum per ASTM B221)

Maximum extrusion length is 10'. Extrusions are supplied without mounting holes. Extrusions will be pre-cut to length and mitered to 90° angles at no additional cost.

For Flush Mounting 1/8" (3.18mm) Flat Panels

- ALE-1A** Single flange for corner members 1/8" (3.18mm) flat panel.
- ALE-2A** Double flange for corner members 1/8" (3.18mm) flat panel.
- ALE-2B** Double flange, corner member for 1/8" (3.18mm) flat panel combination flush and recessed.
- ALE-2D** Double flange provides joining member for a variety of panels.
- ALE-3A** Triple flange provides joining member for a variety of panels.
- ALE** No flanges.

For Flush Mounting 5/8" (15.87mm) Formed Panels or Recessing 1/8" (3.18mm) Flat Panels

- ALE-1** Single flange used as corner member flush 5/8" (15.87mm) or recessed 1/8" (3.18mm) panels.
- ALE-2** Double flange used as corner member flush 5/8" (15.87mm) or recessed 1/8" (3.18mm) panels.
- ALE-2C** Double flange provides joining member for mounting flush 5/8" (15.87mm) panels.
- ALE-3** Triple flange provides joining member for mounting flush 5/8" (15.87mm) or recessed 1/8" (3.18mm) panels.
- ALE-4** Quad flange provides center support joining member for internal mounting flush 5/8" (15.87mm) or recessed 1/8" (3.18mm) panels.

Accessory Mounting Channels

- ALS-A** Horizontal support member used with ALE-1A, -2A, -2B and -3A frame members for mounting ALM.
- ALS** Horizontal support member used with ALE-1, -2 and -3 frame members for mounting ALM.

Note: Dimensions noted above are for reference only.

PDMTA Desktop Cabinets

PDMTA Desktop Cabinets

PDMTA desktop cabinets feature radius edge styling. They are available in 19" and 24" widths. Desktop cabinets can be modified for custom applications. *(Special sizes and color options are quoted upon request)*

All AMCO desktop cabinets are available with an optional concealed handle for easy, ergonomic transport. Protective rubber feet are standard.

18.5" depth PDMTA desktop cabinets are capable of utilizing light duty shelves, as the shelves have a 16" depth. For 25.75" depth cabinets, light duty and heavy duty shelves can be used. Solid and louvered enclosure panels are also available. *(See page 21 and 22 for accessories)*

PDMTA Desktop Cabinet Features:

- EIA Standard 310D
- Aluminum framing system with clear anodized aluminum radius styling
- Fixed vertical mounting channels, front and rear
- Cabinets are supplied open front and rear
- Protective front-to-back vinyl bumper inserts and four rubber feet
- Black expanded aluminum bottom panel
- Uses most standard accessories

Note: For 24" panel opening width, change 19 to 24 in part number. (i.e. PDMTA3-19-18-PT becomes PDMTA3-24-18-PT)

For Size 29W, contact AMCO Direct for Pricing & Lead Times

Note: If handles are desired for PDMTA cabinets, add "-H" to the end of part number. Handles are optional at additional cost. Handle is not available on PDMTA3 cabinets. Handles cannot be ordered separately; they must be ordered with cabinet.

Frame Color Options

Pottery White 101-T	Light Blue 111-T	Silver 112-T	Gunmetal 113-T	Black 116-T	Pearl Gray 122-T	Pebble Gray 123-T	Light Beige 125-T	Cranberry 126-T	Medium Blue 816-T	Glacier White XCP-151T

Note: Add color number at end of rack part number (i.e. PDMTA3-19-18-PT becomes PDMTA3-19-18-PT-101-T)

Note: AMCO offers standard color choices (up to 2 per console) for no extra charge. Custom colors are available and quoted upon request.

Handles

Optional concealed handles are available for easy, ergonomic transport.

Bottom Panel

PDMTA cabinets come with black expanded aluminum bottom panels.

Rubber Feet

Protective vinyl bumper inserts and rubber feet come standard with PDMTA Cabinets.

Frame

Cabinets utilize aluminum framing system with clear anodized aluminum radius styling.

Note: Image above displays a custom powder coat finish.

PDMTA Mounting Accessories

IMB Brackets

IMBs are for a single accessory. They mount to the sides of the PDMTA "L" style internal mounting rail. There is one height of 2.16" and depth of 1.37". It features round holes for equipment mounting.

IMA Brackets

IMAs are used when multiple accessories are part of the design. They are available in all seven RU heights and have a depth of 1.37". IMA brackets feature round holes for equipment mounting.

Technical - Frame

Titan EP Frame Construction

- Four separate 14 GA. main channels provide a rugged frame assembly.
- Uni-strut horizontal channels are welded to vertical rails providing full depth equipment adjustments.
- 12 GA. Caster brackets are welded into the corners of each frame. Each bracket includes a weld stud for grounding.

Add to overall height

- Heavy duty casters- 1.75"
- Light duty casters- 1"
- Leg levelers- .625"

Certifications & Testing

- EIA 310D Equipment Mounting
- Mil Std. 810E Vibration
- Mil Std. 901D Shock
- Certified Load Rating
 - Static: 5,400 lbs.
 - Dynamic: 3,300 lbs.

Other AMCO Products

AMCO Offers Many Solutions

AMCO has developed a line of racks for the Data, AV and security industries that can meet almost any of your design requirements. All AMCO racks are certified to EIA310D.

TitanDT

TitanDT has the highest static and dynamic load ratings in its class. It pairs a sleek aesthetic with an efficient design. AMCO racks are modular and can be expanded and configured to meet current and future needs.

Seismic Racks

Zone 4 certified racks are available in a variety of standard heights, widths and depths to meet NEBS GR-63-CORE specifications for seismic events.

Shielded Racks

RFI racks limit radiated emissions and are certified to MIL STD 285 for higher-level shielding requirements.

Shielded racks are available in a variety of standard heights, widths and depths.

TN Series

AMCO has developed a line of commercial racks for electronics packaging, security and AV. These racks have a full range of heights, widths and depths for a variety of applications including: media closets, security and general electronics packaging.

Custom Designs

AMCO recognizes the need to build rack systems for customers that are not commercially available. We create specialized designs for customers that require standard rack products. Contact us today at 847-391-8100 for more information.

Warranty & Policies

A. Choice of Method of Shipment

Unless otherwise specified, AMCO Enclosures are shipped as individual modules per ISTA packaging certification with single width components assembled on the frame. Upon request, console arrangements will be completely assembled at the factory and shipped like furniture, via van, at no additional charge for assembly. Console arrangements may also be crated for shipment. Crating charges will be quoted for each such order, as console arrangements vary.

B. Design Changes

To allow continued progress, improvement, and adaptability in an advancing industry, AMCO Enclosures reserves the right to make product changes as deemed necessary.

C. Price Discounts

Purchase orders cannot be combined for discount advantages.

D. Proprietary Rights

The catalog and drawings contain information deemed proprietary to AMCO Enclosures and are to be used only for the purposes for which they are submitted and, further, shall not be copied in whole or in part without the prior written consent of AMCO Enclosures.

E. Cancellation & Return

Cancellation and return charges begin at 40% with a minimum of \$50.00, depending on the nature of the order and the extent to which it has been processed. All returns have a 30-day, upon receipt, time limit. Returns must be freight prepaid and not made without the prior written approval of AMCO Enclosures.

F. Terms

All quotations, order confirmations, published prices, and discounts based on delivery F.O.B. AMCO Enclosures, 1 Innovation Drive, Des Plaines, IL freight collect. Invoice payment terms-net 30 days.

G. Sales Representation

Experienced factory sales representatives in all principle cities of the U.S.A., Canada and Mexico. Ask for sales representative listing. AMCO Enclosures equipment is thoroughly inspected prior to shipment. No returns of damaged equipment will be accepted without prior written approval of AMCO Enclosures.

Designed and
Manufactured in the USA

IMS Engineered Products is

ISO9001 Certified

Limited Warranty

AMCO Enclosures will repair or replace enclosures, accessories, and components manufactured by AMCO Enclosures that are proven to be defective in material or factory workmanship under normal use during the Period of this Warranty.

Warranty Period

Ten years from date of purchase. (Non-transferable)

This warranty does not cover:

- Failure in whole or part resulting from misuse, alteration, excessive temperature, excessive humidity, corrosive environment, or lack of maintenance.
- Any materials or components used or manufactured pursuant to the purchaser's specifications.
- Items ordered in error or not required.

Power/Accessories

Warranty as specified by manufacturer.

Warranty Repair

Purchaser shall obtain controlled authorization number before returning any items alleged to be defective to AMCO Enclosures.

Inspection

AMCO Enclosures shall have the right to inspect any and all allegedly defective items on-site at purchaser's convenience.

Disclaimer of Consequential Damages and Limitations of Implied Warranty

AMCO Enclosures disclaims any responsibility for loss of time or use of parts or equipment wherein AMCO Enclosures, components, or accessories are used, transportation or any other incidental or consequential damage; and any implied Warranties including the implied Warranty of merchantability and fitness for intended use are limited to the duration of this written warranty.
